

Inventor: Sines
Serial No.

PATENT APPLICATION
Navy Case No. 79,955

generating component, said thermally conductive strips receiving heat from the heat generating component; and

removing heat from the thermally conductive strips.

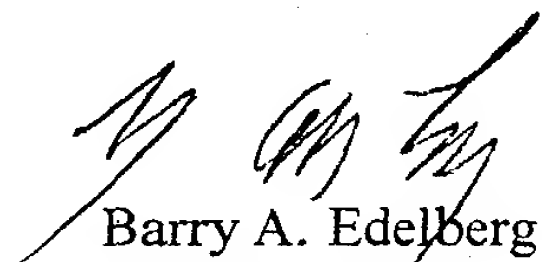

26. (New) An electric motor, as in Claim 13, further comprised of one or more thermocoolers adjacent to and touching the outer casing of the motor to conduct heat from the metallic laminations forming the outer casing of the motor.

REMARKS

All amended specification and claims contain no new matter. The antecedent basis for all amendments being found in the specification and prior claims as filed.

The Application and all claims are in condition for allowance and such action is respectfully requested.

Respectfully submitted,

Barry A. Edelberg
